## GRUPO BIMBO REPORTS THIRD QUARTER 2007 RESULTS

Mexico City, October 25, 2007. Grupo Bimbo S.A.B. de C.V. ("Grupo Bimbo" or "the Company") (BMV: BIMBO) today reported its results for the third quarter ended September 30, 2007.*

A solid pace of growth in the quarter, with outstanding results in Latin America, led to a $6.7 \%$ rise in net sales from the year ago period, to Ps. 17.9 billion. This is attributable to steady volume gains and a better sales mix, as well as to pricing actions taken across all regions to offset the price escalation of the Company's key raw materials.

Due to fluctuations in the international commodity markets, the Company continues to experience higher prices of wheat, oils and dairy when compared to the previous year's levels. This resulted in continued pressure on the gross margin, which declined by 10 basis points year over year. However, a more efficient sales mix, selective pricing actions, and tighter controls of administrative expenses led to a 30 basis point improvement in the operating margin, to $10.3 \%$.

Mainly as a result of higher sales and operating income and a decrease in financing costs, net majority income rose $18.3 \%$ year over year, with a 0.6 percentage point expansion in the net margin, to $6.6 \%$.

## Mexico

Net sales rose $5.9 \%$ in the quarter to Ps. 12.4 billion as a result of the following factors: higher overall volumes, ongoing product launches, and a better sales mix due mainly to selective price increases and better management of inventories at the point of sale. Sliced bread and sweet baked goods led category growth, while the non-traditional channels continued to register the highest growth rate, as per plan. On a cumulative basis, net sales in Mexico increased $6.9 \%$, reflecting steady volume gains and higher average product prices, due to the pricing actions taken during the last twelve months.

## United States

During the quarter, net sales registered a $3.1 \%$ increase in peso terms, and $5.0 \%$ in dollar terms, driven by higher volumes and prices for select brands, as well as new product launches. Additionally, top line performance reflected strong volume growth in Mexican brands, as well as the ongoing optimization of the product portfolio. In the first nine months of the year, sales rose $4.6 \%$ and $6.8 \%$ in peso and dollar terms, respectively, with growth across the entire portfolio.

## Latin America

Despite a tougher basis of comparison, net sales in the region continued to grow at double digit rates, rising $18.4 \%$ and $21.2 \%$ in the quarter and nine months, respectively. Growth was strong across the entire region, with outstanding results in Colombia and Venezuela. Performance was driven by new product launches and higher average prices, combined with the ongoing aggressive market penetration strategy that resulted in 26,500 new customers added in the quarter. Additionally, third quarter results reflect incremental revenues for small acquisitions made in the region at the end of the previous quarter. Excluding these results, net sales would have increased $12.6 \%$ and $17.3 \%$ in the quarter and in the nine-month period, respectively.

## Gross Profit

During the quarter, the consolidated gross margin declined by only 0.1 percentage point, to $54.0 \%$. The primary driver of the $7.0 \%$ increase in the cost of goods sold was higher year over year prices for commodities such as wheat, oils and dairy. This was somewhat offset, however, by the pricing actions taken during the last twelve months and the improvement of the sales mix, as well as lower indirect production costs in Mexico and a reduction in labor cost in the U.S. operation. It is important to note that the latter operation has been reallocating some production capacity to more profitable SKUs, an initiative that is expected to continue having a beneficial impact in the coming quarters. In Latin America, however, strong top line growth was not sufficient to offset the impact of higher raw materials prices and temporarily higher indirect costs, mainly related to the integration of new operations.

For the first nine months of the year, the consolidated gross margin was $52.9 \%$, a 0.5 percentage point decline when compared to 2006.

## Operating Expenses

Operating expenses represented $43.7 \%$ of net sales in the quarter, a 0.4 percentage point improvement from the year ago period. This is primarily attributable to a more efficient sales mix and lower administrative expenses across all regions, a result of the Company's efforts to offset gross margin pressure. Distribution expenses were virtually unchanged from the year ago period as a percentage of net sales, despite the investments, currently in process, to streamline the distribution network in Mexico, and to expand it in the United States and Latin America. It is important to note that, in the latter, higher sales more than offset the expenses related to the aggressive expansion.

On a cumulative basis, operating expenses as a percentage of net sales registered a year-over-year decline of 0.4 percentage points, to $44.6 \%$, reflecting a combination of a better sales mix in all regions and a decrease in administrative expenses that more than offset the higher investment in distribution.

## Operating Income

Operating income rose $9.7 \%$ in the quarter, with a 0.3 percentage point expansion in the margin, to $10.3 \%$, driven by higher sales, an improved sales mix and lower administrative expenses. It is important to note that this improvement was largely driven by performance in the international operations, where the margin expanded by 0.7 percentage points in both the U.S. and Latin America.

It is important to mention that in the coming quarters, these factors may have an opposite affect on the Company's operating performance. While operating improvements will continue, raw material prices will be higher than those registered during the first nine months of the year.

For the first nine months of the year, operating income rose $5.3 \%$, with a 0.2 percentage point decline in the margin, to $8.3 \%$. This was the cumulative result of increases in the cost of goods sold and distribution expenses, mainly in Mexico.

On a regional basis, operating margin in Mexico remained stable in the quarter due to a better sales mix, higher prices and the control of administrative expenses, which combined, offset the impact of higher raw material prices. In the nine month period, however, these savings were not sufficient to offset gross margin pressure, and despite the $0.8 \%$ increase in operating income, the margin declined by 0.6 percentage points to $11.1 \%$.

In the U.S. operation, a more favorable product mix and higher prices, as well as lower labor costs and administrative expenses generated a strong $166.1 \%$ rise in operating income, with a 0.7 percentage point gain in the margin to $1.1 \%$. Year to date, operating income rose $20.3 \%$, equivalent to a 0.2 percentage point improvement in the margin, which was $1.6 \%$.

Despite the gross margin contraction in the quarter, the operating margin in Latin America expanded by 0.7 percentage points, to $3.7 \%$, benefiting from lower operating expenses on a percentage basis, with strong performance in Venezuela and the continued reduction of losses in Argentina worth noting. As a result, operating income rose $46.1 \%$. On a cumulative basis, operating income rose from Ps. 7 million in the year ago period, to Ps. 160 million in the first nine months of 2007, resulting in a 2.9 percentage point improvement in the margin, to $3.1 \%$.

## Comprehensive Financing Result

Comprehensive financing cost decreased by $22.8 \%$ to Ps. 80 million in the third quarter of 2007, from Ps. 104 million registered in the same quarter of last year, due mainly to lower net interest expense reflecting the decline in the Company's debt level. On a cumulative basis, however, exchange losses over the nine month period led to a $19.5 \%$ rise in the financial cost, to Ps. 261 million.

## Net Majority Income

Net majority income totaled Ps. 1.2 billion in the third quarter, an $18.3 \%$ increase from the year ago period. Net margin was $6.6 \%$, a 0.6 percentage point expansion from the same period of 2006. This mainly reflects the gain in operating income and lower financing costs during the period.

| 6.6 | 6.0 | 0.6 | Consolidated | 5.2 | 5.3 | $(0.1)$ |

On a cumulative basis, net income rose $6.3 \%$ to Ps. 2.7 billion. The 0.1 percentage point reduction in the margin to $5.2 \%$ was due to the decline in the operating margin and extraordinary income registered in the second quarter of 2006 related to a favorable judicial ruling, and in the first quarter of 2006 for the sale of the Company's share in Agusa.

## Operating Income plus Depreciation and Amortization (EBITDA)

EBITDA rose $11.5 \%$ quarter over quarter to Ps. 2.4 billion, while EBITDA margin improved by 0.6 percentage points to $13.5 \%$. This was largely the result of gains in the operating margin. On a cumulative basis, EBITDA rose $7.7 \%$ to Ps. 6.0 billion, with an $11.4 \%$ margin, implying a 0.1 percentage point decline year over year. The absolute gain was attributable to increases in all regions, generating strong margin improvement particularly in the case of Latin America, where EBITDA margin expanded by 3.0 percentage points.
